FINANCIAL AND COMMERCIAL.

SATURDAY, July 1. The stock market exhibited a good deal of genuine strength in to-day's brief session. The buying was well distributed. Union Pacific and the United States Steel shares, which had been heavy for two days under profit taking by followers of the advance who were unwilling to carry long contracts over the end of the week, recovered sharply, and there was some fresh buying also in other stocks to which the realizing of Thursday and Friday had imparted a reactionary tendency. London houses bought stocks where previously they had been selling. Operations of a somewhat concentrated character in Erie common advanced that stock to the highest

Very little attention was paid to the bank statement, possibly because the community had made up its mind not to be surprised by anything that it might show on the eve of the July interest and dividend disbursements. Preparations to finance these disbursements were reflected on Friday in the advance of the call interest rate to 6 per cent. Prominent banking houses loaned money heavily on that advance in the rate. and some of the money thus provided may be recalled on Monday. No further unsettlement after that is looked for. The bank statement showed a gain of \$1,375,700 in the cash holdings of the banks, whereas the known movements of money had indicated a loss of about that amount. It showed also an increase of \$18,056,300 in loans. This large increase in loans caused deposits to expand. An increase of \$19 -246,000 in deposits increased reserve requirements \$4,811,500, and as the increase of cash or actual reserve was only \$1,375,700, there resulted a shrinkage of \$3,435,800 in surplus reserve. This brings the total of surplus reserve down to \$12,658,875, as compared with \$36,105,300 for the corresponding week of last year and \$8,377,675 for the corresponding period of 1903.

The week on the whole has been one of improving prices. The most pronounced symptoms of revolution that have yet appeared in Russia, continued dep financial markets of Europe. tion of \$3.300,000 gold and vances in speculative grain options all were steadily dis the stock market. On Thurs tionary tendency developed profit taking of cautious Many followers of the advance to remain committee side of the market over the week, with the Fourth of Ju near at hand. Under this real continued well into Friday's market showed a great deal The buying at moderate price was apparently stronger than The general strength exhibited short session and, above all, th which prices were advanced pr conclusively that the technica the market was unimpaired.

The strong point about the r ish commentators keep insistin commission houses are not los stocks and have a big surplus They and in this condition of the centive for a bult campaign in siming at a distribution of sto sible, on a higher level of pri has been no distribution of sto of on the advance that has ta the last two weeks. It is doub mission house holdings on the a increased 10 per cent. There tions, of course, and it is kno eral of the larger speculative in particular, have been takin pretty freely, but this is held to prejudice to continued improve market by persons who are co the interests of prominent ban vations lie in the direction of a market during the next sixty believed, indeed, and not without good reason, that some of the most influential factors in Wall Street are cooperating on the bull side of the market as they have

not done before for many months. It may be said with all reasonable assurance that the weight of influential banking opinion is on the side of higher prices. Those who are at present in control of the market believe that the indifference exhibited up to this time by the market's outside following can be overcome and that after the holiday the response of commission houses to a further improvement in prices will be more pronounced than it has been to the improvement of the last two weeks. There is at least room for a much larger professional and semi-professional speculation in such stocks as those in which the market is now being made.

Sustained improvement, of course, will be contingent upon undisturbed optimism concerning the outcome of the crops. A further advance of 5 cents in the speculative wheat option this week was naturally viewed with some misgivings by persons depending upon current crop advices, which are highly contradictory, but a good deal of allowance needs to be made for the fact that a good crop of wheat this season should sell high owing to the strength of the cereal's position in the markets of the world. The bull crowd now operating in the wheat market was favored unexpectedly this week by the destruction wrought at Odessa, one of the most important grain ports in the world. A month or six weeks ago crop predictions were altogether too sanguine. Owing to the unusually favorable conditions under which the crops started, however, there has been room all along for considerable deterioration and still a normal yield. Nobody has yet estimated the production of winter wheat under last year. That crop is practically made. A good deal still depends upon spring wheat and corn. Those who

have most at stake in the matter from Wall Street point of view are appare satisfied with the crop outlook as a whole

THE OUTSIDE MARKET.

The two hours devoted to business in the market for outside securities to-day contained nothing eventful or of especial interest, and the natural Saturday dulness was intensified by the absence of a number of brokers who were taking advantage of the holiday on Tuesday to enjoy a longer recess than usual. Greene Consolidated Gold, which was the only stock in which trading assumed more than nominal proportions, held firm in spite of the publication of a statement from the former treasurer of the company to the effect that the expert who had made the extraordinarily unfavorable report on the property, recently made public, held himself ready at any time to prove his findings. Other mining stocks were quiet, but in nearly all cases quotably higher. Northern Securities moved up 1/4 a point and the "stubs" 121/4 points. Among the inactive issues a sharp decline in the quotations of indianapolis Gas stock attracted some attention. The last reported sale of these shares was made at about 70, but at the close to-day no bid above 55 could be obtained for them. The bond department was lifeless. The transactions in the market to-day were as follows:

1	Sandstorm	1214	The cotton market showed he heat coase on the eve of a Government report, there was a good deal of evening up of contracts, and as may be well imagined this meant the closing out of long cotton in many cases. In New Orleans there was a feeling in favor of a reaction not only among out and out bears, but among sold out buils. Meantime there was a good deal of selling here by local and Southern operators. Some of the New York selling is understood to have been for large built interests, if not for the buil leader himself. He gave supporting orders from time to time, but some thought that he and his associates took profits to some extent. The Government report of Monday is awaited with unusual interest because there is alone a wide divergence of opinion as to what the condition will be. Recent reports by individual statisticians, private firms and newspapers have put the condition at anywhere from 76 to 82 per cent against 77.2 a month ago, 88 a year ago and 84.6.	BANK

M. M. BELDING, Jr., President. BUSINESS TROUBLES.

Creditors Accuse Two Bankrupts of Concealing Assets. Macgrane Coxe, referee in bankruptcy,

894,461 84 \$2,037,540 73

of 63 Wall street, has made a report recommending that a discharge from bankruptoy be denied to Charles E. Smith, auctioneer, of 7 West Twenty-ninth street, on the ground that he concealed \$17.500 from his trustee in bankruptcy. The referee says that Smith was for six years in business as the Knickerbocker Auction Rooms, at 8 West Twenty-eighth street, and since his petition was filed has been engaged in a similar business under the title of the Knickerbocker Art Galleries, at

engaged in a similar business under the title of the Knickerbocker Art Galleries, at 7 West Twenty-ninth street. Mr. Smith says he is not the proprietor, but only a salesman employed by the owner, Edward Berger, a pawnbroker. Creditors allege that this is a subterfuge and that the new place is operated with funds taken from the proceeds of his former business and thus concealed from his estate in bankruptcy. Mr. Smith is the auctioneer who recetnly sold the effects of Cassie Chadwick.

Opposition to the discharge in bankruptcy of Samuel I. Acken & Sons, mason bulleers, of 1183 Broadway, has been raised by Bridget Carey, who alleges that they concealed from their trustee in bankruptcy \$50,000 in cash, a claim of \$9,000 against Arthur H. Ely, a house and two and a half acres of land at Haworth, N. J., three coal yards at Haworth, Harrington and West Norwood, N. J., and 1,000 shares of Samuel I. Acken, Sr., had been engaged in business and made large profits which he invested in real estate carried in his wife's name, which actually belongs to his assets.

Daniel D. Lockwood, farm laborer at Awosting, Ulster county, has filed a petition in bankruptcy here, with liabilities \$1,795 and no assets.

BANK STATEMENT.

BANK STATEMENT.

Heavy Increase in Loans. The forecasts of the weekly bank state-

ment published on Friday had not been especially optimistic, but the exhibit made by the banks, at least in its details, came somewhat as a surprise to Wall Street. The change in the cash item was in fact more favorable than had been looked for, as it
